CUSTOM SIZE MEASUREMENT FORM

Women's Jacket

Before you start

- Ask someone to measure you. Measuring yourself is less accurate.
- Wear thin clothing, such as a T-shirt and leggings.
- Stand straight and relaxed, with your feet together.
- Use a soft tape measure. Keep it level and snug, but not tight.
- Tie a string around your waist first. It settles at your natural waist and makes the waist easy to find.
- If your garment has armor or a back protector, measure with the protector on, firm against the body.
